Dr. A.C. ARULDAS HOSPITAL

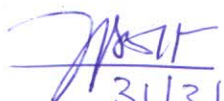

HOSPITAL : 58/25, Venugopalswamy Koil Street, Perambur, Chennai-11.

I Dr Benedict Aruldas run a twenty bedded hospital in Perambur, Chennai. I recently have purchased Hospital management software from Avanttec and I like to share my opinion regarding this product.

As we all know today hospital management software has become inevitable for us. One cannot run a hospital without it. Making the right choice becomes a difficulty. For a small hospital like us, obtaining affordable and quality software becomes a difficulty because HMS for a hospital need to be web based, holistic, user friendly, must meet the standard of accreditation, needs strong support from company and must come at an affordable cost. To obtain such software is very difficult without paying a huge price.

After researching with much software I was not satisfied with any of them, and then I met the Aventtec software company people, The Company has taken initiative to provide holistic software at an affordable cost; they have done this as an initiative to provide affordable health care to our people. I congratulate them for their initiative. The software is very good; it is just the software a hospital expects. I have recommended the software to many of my friends. I strongly advocate this product to my fellow doctors; I recommend trying this product before making any choice.

I wish the company great success in their mission to provide affordable health care to our country.
