

GASTRONET IMAGING NETWORK INSTALLATION @ BAHRAIN SPECIALIST HOSPITAL

Product Strength, Speaks Always...

Another milestone in our imaging solution

Avanttec is very happy on installation of GastroNET in **Bahrain Specialist Hospital (BSH), Bahrain**. BSH is our first Imageplus network customer way back in 2002. We are very proud to say that; Imageplus network has been running NON-STOP since 2002, not even a single downtime, it could meet up the growth of BSH, escalation in patient footfall, increase in number of Gastro procedures and so on.

When BSH wanted to expand the network to all their endoscopy suits, laparoscopy theatres, ENT department, BSH satellite centre at RIFFA; Avanttec was the preferred vendor.

Gastronet is a network of 9 x Imimo+ recording workstations, 3 x Imimo+ reporting workstations, Imimo+ recording workstations in BSH satellite centre at RIFFA, viewers in all the consultant rooms (unlimited user license), seamless integration with their existing HIS and migration of data from existing Imageplus network. Highlight is that; all these was completed JUST IN 5 DAYS including the training to all the doctors, reporting team, IT team by our Implementation team.

Project Planning

Discussion between Our Mr. Chandrasekar and Mr. Nadim Navde, Director – IT on Project Planning.

Happy user

"Single screen Operation, user friendly GUI" – (Dr. Sagar & Team) - Happy faces at the Imimo+ reporting workstation.

Implementation / Training

By our team

Product presentation of Gastronet by Our Mr. Samuel to BSH Team

Experienced user of Imageplus – More than 15 years!!!!

Mr. Nadim explains the strength of the GastroNET & distinct features to users

Dr. Abdul Kareem Al Azzawi (Medical Director) – viewing the endoscopy images of Manama centre from RIFFA which is located 30 KMs away from Manama)
